CURRICULUM VITAE:

I am Tolgahan İpek. I graduated from Kırıkkale University, Department of Computer Engineering. I am extremely interested in technology and science. Apart from this, In addition, I have developed projects in the field of mobile applications in Android Studio, such as a word puzzle game and a chat application. Finally, I am confident in myself in terms of solution orientation, communication in business life, agility, strategy development and team work.

EDUCATIONAL INFORMATION:

University :

Kırıkkale University COMPUTER ENGINEERING Bachelor's Degree (2017-2021)

Graduation project :

As a graduation project, I developed a chat application in Android Studio that has common aspects with WhatsApp. In this application I used firebase technology to store messaging and messaging content. Pictures and different contents can be sent as messages. Options such as sending a message request and adding a person are also available.

INTERNSHIP EXPERIENCE:

ICM SOFTWARE INNOVATIVE CODE MOTION (July 2019-August 2019) I developed a cms-based dynamic trading website with user login and admin panel using php, javascript, html/css and mssql technologies.

E-KALİTE SOFTWARE DEVELOPER (October 2023-November 2023)
I worked on Web applications with PHP,Javascript,Html,Css,Gitlab,Git, and Mysql Technologies. I tried to complete the tasks assigned to the Project via Gitlab as much possible and to debug the bugs that emerged regarding the Project.

JOB EXPERIENCE:

ZONTROY YAZILIM A.Ş (May 2024-Continues to work) We develop web and personal software that takes advantage of .Net core, React. Js, Swagger Api, AWS, Jira, Mssql server Technologies. We are also working on zontroy code generator sotfware, which allows sotfware improvement costs to be greatly reduced.
